Probiotic Formulas Increase Animal's Health Benefits

Bio S.I.'s Jackpot I&II Livestock and Equine Probiotics boosts digestive health

Justin, TX – August, 2013 – Keeping livestock healthy is essential for any agricultural operation. According to a recent article published through Oxford University Press, “Interest in probiotics is at an all-time high in the United States, driven in part by new products emerging in the market”.¹ Fortunately, Bio S.I. Technology (www.biositechnology.com) has created their proprietary Jackpot I&II Livestock and Equine Probiotics formulated for livestock and horses to help maintain their health.

The microbes found in Bio S.I.'s probiotic products for poultry, horses, goats, dairy and beef cattle, and hogs will help ensure that your stock remains healthy—the natural way. This all natural formula helps restore healthy levels of naturally-occurring beneficial microbes to livestock and horses' digestive tract. These microbes help reduce gastrointestinal problems that result from highly populated living conditions, and may help reduce the overall use of antibiotics. Simply adding Jackpot I Livestock Probiotic or Jackpot II Equine Probiotic to animals' drinking water will increase their health benefits.

Jackpot I Livestock Probiotics brings beneficial soil-borne microbes (bacteria), created in nature, to the animals. The microbes in Jackpot I help to maintain the animals' digestive systems for optimum digestion of food. When livestock are kept in contained areas, stress causes them to assimilate their food improperly, restricting them from the essential nutrients needed for weight gain. Gaining weight is a critical component to the livestock's' prosperity and with compromised digestion of food due to the loss of proper microbes in the digestive tract, producers lose money every day. Simply adding Bio S.I.'s Jackpot I Livestock Probiotics to the animals' drinking water or feed will allow them to maintain the optimum level of beneficial microbes for digestion. In turn this will promote better utilization of feed, reduced stress caused by boarding/shipping/hauling, and reduce stress caused by antibiotic use and worming.

Similarly to Jackpot I, Jackpot II contains the necessary beneficial microbes to keep digestive tracts of horses working, healthy, and may reduce the reliance on low-dose and prophylactic antibiotics. Normally, beneficial soil microbes are ingested when a horse is grazing. Much of the time, small amounts of soil are ingested with the grass; this soil is where the microbes come into the digestive tract. Unfortunately, many horses are unable to graze as much as they need. This is why horses

REBUILD. RESTORE. RENEW.

are unable to naturally sustain healthy levels of beneficial bacteria. With the added stress of moving them, changes in their environment, and being kept in confined areas for long periods of time can affect horses' health. The addition of Bio S.I.'s Jackpot II can help reduce health issues in horses brought on by stress, poor diet, worming, and the overuse of antibiotics.

Bio S.I.'s Jackpot formulas are highly effective and concentrated. Apply 1-2 oz per every 50 gallons of water or 1-2 drops directly on top of feed. Jackpot formulas are available for purchase in pints, quarts, gallons, 2.5 gallons, 5-gallon pails, and 55-gallon drums or totes at farm supply stores or online at www.biositechnology.com. Larger orders can be delivered upon request.

About Bio S.I. Technology

Bio S.I. Technology, LLC is a USDA BioPreferred™ member and includes a team of experts who have over 20 years of experience producing microbial products. Bio S.I. produces a variety of microbial products including Bio S.I. Turf Formula, Turf Select, Lawn & Garden Formula, Lawn & Garden Select, Agriculture Formula, Pond Formula, Septic Cleanser Formula, Remediation Formula and JACKPOT, a new pro-biotic product which brings the naturally beneficial soil borne microbes found in nature to animals. For more information about Bio S.I. Technology, or to purchase their cutting-edge formulas, please visit www.biositechnology.com.
