Bio S.I. Knows The Importance of Protecting Intertwined Waterways

Keeping Interconnected Waterways Pure with Water Doctor

Justin, TX – (December 2014) – Water is the keystone of life and as waterways are interconnected, keeping all water clean is crucial to the health of lakes, ponds, rivers, and oceans. Contamination spreads to fish, livestock, plants, and public drinking water. **Bio S.I. Technology** (www.biositechnology.com) offers, **Water Doctor** as an all-natural solution to murky lakes and ponds to maintain water health from the smallest scale.

According to an EPA report, more than 250 million Americans rely on unpolluted, fresh water sources¹. Water Doctor improves the aquatic environment, leading to healthier wildlife, and healthier humans. With potential run off coming from lawns, gardens, golf courses, and farms, Water Doctor helps everyone do their part to maintain a pure water-system. By adding beneficial microbes to the water, Water Doctor effectively breaks down organic waste, fertilizer compounds, harmful nitrates, phosphates and other contaminants that can ruin fresh water and make it unsafe to drink or unusable.

“Bio S.I.’s Water Doctor is a preventative treatment that works throughout the water layers and through the bottom sludge layers to digest organic wastes,” says Wayne Tucker, CEO of Bio S.I. Technology. “It is not an algacide, but a completely natural and ecologically friendly method of controlling the problems that commonly plague stock tanks, lakes, and ponds. The microbes in Bio S.I. Water Doctor are completely safe, making its use safe for humans, animals, fish, water fowl, and plant life. Like all Bio S.I. products, Water Doctor corrects the problem instead of treating the symptoms.”

Bio S.I.’s Water Doctor restores ponds and lakes to purity and keeps it clean with a blend of natural, environmentally friendly microbes developed to:

- Helps clarify lake or pond water
- Improves the aquatic environment for fish and wildlife
- Breaks down organic waste in the water

¹ <http://www.epa.gov/agriculture/tsur.html>

REBUILD. RESTORE. RENEW.

- Reduces fertilizer compounds from pond water
- Reduces accumulated organic bottom sludge
- Reduces algae growth
- Adds beneficial microbes to the water

Keeping water safe and clean requires more than just treating the water. We have learned that locating the source of contaminates is key to helping reduce their impact on water ways and ponds. By treating these run off areas we can prevent a lot of costs and improve our water for our water ways and animals efficiently and safely. Another Bio S.I. product that we use that helps keep water clean and safe is the Ag + Humus. Ag + Humus is used to treat the areas from which water comes into the ponds, stock tanks, or lakes called “run off areas”. We have farms and golf courses that treat the “run off areas” with the Ag + Humus to help improve plant growth and root systems which improves nutrient uptake to keep nitrates and phosphates from reaching any water system (streams to ponds) of all sizes. Improved plant growth in run off areas will make a real difference in what elements reach the water we need to keep clean.

Water Doctor is available in pints, quarts, gallons, 5 gallon pails, 55 gallon drums and even larger sizes by request. When using Water Doctor, first determine the source of the problem before applying Water Doctor. Water Doctor does not provide overnight results, but with proper application achieves longer lasting, higher quality improvements. For direct purchases, please visit: www.biositechnology.com.

About Bio S.I. Technology

Bio S.I. Technology, LLC is a USDA BioPreferred™ member and includes a team of experts who have over 20 years of experience producing microbial products. Bio S.I. produces a variety of microbial products including Bio S.I. Turf Formula, Turf Select, Lawn & Garden Formula, Lawn & Garden Select, Agriculture Formula, Water Doctor, Septic Cleanser Formula, Remediation Formula, Floor-Mate for animal corrals/pens, and JACKPOT, a new pro-biotic product which brings the naturally beneficial soil borne microbes found in nature to animals. For more information about Bio S.I. Technology, or to purchase their cutting-edge formulas, please visit www.biositechnology.com.

If you would like further information, images, or would like to schedule an interview with Wayne Tucker, President of Bio S.I. Technology, please contact Kevin Oaks via email at koaks@christiecomm.com or by phone at 805-969-3744.
