Bio S.I. Technology Continues Expansion and Adds Executives

*Brandon Boughen Named Director of Education, Outreach and Field Services
and Bob Stricklin, West Coast Sales Representative*

Justin, TX (December, 2014) — **Bio S.I. Technology** (www.biositechnology.com), a leading producer of microbial soil inoculants, recently announced the additions of Mr. Brandon Boughen and Mr. Bob Stricklin to its growing team of agricultural experts. Mr. Boughen joins Bio S.I. as the Director of Education, Outreach and Field Services and brings with him an extensive background in community building, planning and conducting educational programs as the County Extension agent of Agriculture & Natural Resources, at Texas A&M AgriLife Extension Services Division. In this title, Mr. Boughen, also worked directly with landowners to identify needs and provide resources that assist in effective land management, in addition to coordinating economic and marketing extension programs to local farmers.

“I’m more than excited to be adding Mr. Boughen to Bio S.I. at this time,” says CEO, Wayne Tucker, “And to be applying his training in marketing and education to the future of Bio S.I.’s success in sustainable farming.” Together with Bio S.I.’s mission, Mr. Boughen will have a critical role in the roll out and development of the Bio S.I. Sustainable Institute and managing the company’s marketing presence at key tradeshows, and conferences.

Mr. Stricklin began his path in agribusiness by graduating with a degree in Agricultural Business Management from Cal Poly State University. Mr. Stricklin will be handling sales and business development on the west coast, specializing in sustainable farms and cattle ranching. Mr. Stricklin comes to Bio S.I. with more than 20 years in sales and has developed a strong connection to the California’s agro-community. “The farmers and growers I spoken with so far are relieved to finally learn about a product line like Bio S.I.’s, adds Stricklin, “that not only brings nature back to the growing process and restores the health of the soil, but drives down overall operation costs. Bio S.I. truly delivers the best of both worlds.”

The knowledge and experience of both Mr. Boughen and Mr. Stricklin will help to enhance Bio S.I.'s presence in the agricultural and livestock industries continuing to provide outreach about the use of microbes and the effectiveness of Bio S.I. Technology products. Bio S.I.'s full range of nature-based agricultural products and solutions offer growers, gardeners and farmers new, but proven techniques to rebuild, restore, and renew vitality to their soils and improve bottom lines.

About Bio S.I. Technology

Bio S.I. Technology, LLC is a USDA BioPreferred™ member comprised of a team of experts with decades of experience producing microbial products. Bio S.I. produces a full range of microbial inoculants including Bio S.I. Lawn & Garden Formula, Septic Cleanser Formula, Remediation Formula and Jackpot I & II, new all-natural probiotic products formulated to bring beneficial soil borne microbes inside the digestive tracts of livestock and equine.
